

WARNING

Because this leash is retractable, it requires special precautions to reduce the risk of injury.

EYE AND FACE INJURIES

If your dog's collar breaks, or if the leash disconnects from the collar, the hook can snap back and seriously injure your eye or face. Always use the enclosed safety collar in addition to your dog's collar to keep the leash from snapping back.

CUTTING, BURNING, AND FINGER AMPUTATION

If the cord/belt/tape runs across skin, it can cause abrasions (like a rope burn) or severe cuts. If the cord/belt/tape wraps around fingers or catches on a ring, a hard pull on the leash can amputate fingers. Never touch the cord/belt/tape or allow it to wrap around any part of your body.

Do not use this leash with a disobedient or uncontrollable dog. Avoid using this leash near small children, including children in strollers. Only use this leash with a dog that does not exceed the weight limit listed on the package. Leashes for larger dogs have a tape or belt instead of a cord to reduce the risk of amputations and cuts. Belt leashes are also available for smaller dogs.

Everyone who uses this leash must read the enclosed **Special Precautions and Directions** pamphlet.
